LAB TASK 1: CAMPUS CLUB MEMBERSHIP

Topic	HTML and CSS	**Marks**	10 (5% of midterm)
Task time	60 minutes	**Extra time**	15 minutes (GitHub push and file submission)

Scenario

The Programming Club needs a small membership page: a navigation bar, a club information card and a "Join the Club" form. Build the page described below.

Reference screenshot

Important: The screenshot is only an inspiration. Do not try to copy it exactly. Your colors, fonts and text may differ. You are marked on the numbered requirements below, not on how closely your page matches the picture.

Rules

- Write **one HTML file** (for example `club.html`). All CSS must be **internal** (inside a `<style>` tag in the same file). No external CSS, JS or local image files.
- Do not use any framework or library.
- Work in any editor you like. Test the form in your browser.
- You may not use any generative AI to generate code. You are allowed to browse the W3Schools website for reference as well as the slides.

PTO

Requirements (1 mark each)

1	**Page setup.** Valid HTML skeleton with the `<title>` "Campus Club Membership", one internal `<style>` block, and an `<h1>` with the text "Programming Club" that is centered and has a color of your choice.	**1 mark**
2	**Navigation bar.** A `<div class="topnav">` with three links (Home, Events, Join). Dark background (`#333`), light link text with no underline, links side by side (floated left) with `14px 16px` padding.	**1 mark**
3	**Nav behaviour.** A link changes its background colour when the mouse hovers over it. The whole bar stays at the top of the window while the page is scrolled (using HTML positioning).	**1 mark**
4	**Club card.** A `<div class="card">` that is `400px` wide, centred horizontally, with `15px` padding, a `2px solid` border and rounded corners (`10px` radius). Use border radius.	**1 mark**
5	**Card styling.** The card has a white background and a box shadow (`4px 4px 8px gray`). Using a **child selector**, make the `<h2>` that is directly inside the card green with no top margin. Using a **descendant selector**, make the paragraph inside the card italic.	**1 mark**
6	**Badge (positioning).** Inside the card, a small `<span class="badge">` with the text "NEW" (red background, white bold text, small padding, rounded corners) placed in the **top-right corner of the card** using `position: absolute` with the card set to `position: relative`.	**1 mark**
7	**Form structure.** A `<form>` with an `action` and `method="post"`, wrapped in a `<fieldset>` with the `<legend>` "Join the Club". Every field has a `<label>` connected to it with `for` / `id`, and every field has a `name`.	**1 mark**
8	**Text-type fields.** Full Name (required, at least 3 characters), Email (email type, required), and Student ID (required, placeholder `24-56789-1`, must match the pattern `[0-9]{2}-[0-9]{5}-[0-9]`). (Use the pattern attribute)	**1 mark**
9	**Choice fields.** Age (number, required, minimum 17, maximum 40), Membership Type (two radio buttons, General and Executive, required, same `name`), and Preferred Club (a drop-down with a first option "Select a club" that has an empty value, then the available options are: Programming, Robotics and Debate; required).	**1 mark**
10	**Finish the form.** A "Why do you want to join?" textarea (required, maximum 200 characters), a required checkbox "I agree to the club rules", and a submit button "Join Now". The browser must refuse to submit the form while any rule above is violated.	**1 mark**

Submission

1. Create a GitHub repository called “WT-MLT1” (e.g. https://github.com/<your_username>/WT-MLT1). Push your HTML file to that repository using the command line.
2. Submit your HTML file to the AIUB Portal:

   Login to AIUB Portal -> Open the Results page for this section -> Find “Lab Task 1” under midterm grades -> Click the "Upload document" link -> Upload your HTML file on this page.

   If you upload a wrong file by mistake, you can upload again within the deadline. **Only the last submission will be graded.**

Total time: 60 minutes for the task + 15 minutes for the GitHub push and file submission.
